

MXW - Combined buffer store / DHW pipe in pipe Maxiwarm

Mild steel hot water thermal buffer for the storage of primary water produced from continuous and discontinuous heat sources.

Instantaneous production of domestic hot water (DHW) through a high efficiency heat exchanger made of a corrugated stainless steel pipe.

Available in:

- only storage + DHW production

- storage + DHW production + one auxiliary fixed coil
- storage + DHW production + two auxiliary fixed coils.

The thermal fluid contained in the cylinder and in the primary heat exchangers must operate in closed circuit (without oxygen), in order to avoid corrosion phenomena. Cylinders are also prepared to host a backup immersion heater (not supplied).

HEAT SOURCE

APPLICATION

TECHNICAL FEATURES

DHW Heat exchanger

Buffer vessel

Auxiliary heat exchanger

General features

Material	AISI 316L Stainless steel (1.4404)
Internal protective treatment	Pickling and passivation
External protective treatment	Pickling and passivation
Type	High exchanging surface corrugated pipe
Rating (P max. / T max.)	6 bar / 95°C
Material	S 235 Jr Carbon steel
Internal protective treatment	None
External protective treatment	Anti rust protection + epoxy painting
Rating (P max. / T max.)	3 bar / 95°C
Material	S 235 Jr Carbon steel
Internal protective treatment	None
External protective treatment	None
Type	Fixed coil
Rating (P max. / T max.)	10 bar / 95°C
Capacity	600 - 2000 L
Warranty	5 years
Insulation	- Soft insulation with polyester + PVC: Fire retardant class B2 (DIN 4102) - Hard insulation: - Polyurethane foam + PVC for 600/800/100/1500/2000 litres capacity: Fire retardant class B3 (DIN 4102) - Polyester (15mm) + polystyrene (85mm) + PVC for 1250 litres capacity: Fire retardant class B2 (DIN 4102)
In compliance with	- Pressure Equipment Directive (PED) 2014/68/UE Art. 4 Para 3 - Italian MOH specifications (products suitable to contain potable water) - Energy related Products (Erp) Directive 2009/125/CE
